"The Muffin Problem"

Monday, January 30, 2023 Talk at 4:00 p.m. – Hilles 109 Tea 3:30 p.m. – Foyer outside of H109

Abstract:

Let's say you have 5 muffins and you want to cut them up and give them out to Alice, Bob, and Carol so that they each get 5/3. This is easy! You can cut each one into 1/3-1/3-1/3 and give each person five 1/3-pieces. But then the smallest piece is 1/3. Can we do better? Is there
